

NuFlights REL 3.29- 2026-04-16- Release Notes

Release	NuFlights 3.X-21.3 Releases REL3.29 RELEASED
Date	Apr 16, 2026
Version	REL3.29
Description	REL 3.29 Includes 84 tickets Production deployment on: 16-04-2026 Sprint 75 /76 Started from 19-03-2026 to 16-04-2026
Contributors	@Sreekutty K V @Jeet Das @Arjun Kadumberi @Lesiya Simon @Ranjith Kumar R

Summary

This release focuses on enhancing platform stability, accuracy, and user experience across booking, ancillary, and agency management workflows. Key fixes address critical issues such as ancillary pricing inconsistencies, UI misalignments, and data validation gaps, ensuring more reliable order processing and display.

In addition, several improvements have been implemented in Agency Admin and Airfile handling, along with UI refinements and backend validations to strengthen data integrity. Overall, this release delivers a more consistent, stable, and seamless experience across core system functionalities.

New Features

- [R2X23M-3259: Adhoc Discount and Service Fees](#) DONE

Introduced support for applying adhoc discounts and service fees, enabling flexible pricing adjustments during booking.
- [R2X23M-3295: Flexible TK Seat Selection via Service Configuration](#) DONE

Enabled configurable seat selection for TK, allowing more flexibility in managing seat selection behavior through service settings.

- [R2X23M-3461: Fix cases where a conjunction ticket is refunded and a refund is given for c](#)
[onjunction ticket in account statement](#) DONE

Resolved issues with incorrect refund handling for conjunction tickets to ensure accurate reflection in account statements.

- [R2X23M-3596: Passenger / customer Credit Card Payments](#) DONE

Enhanced support for passenger/customer credit card payments to improve payment flexibility and processing.

- [R2X23M-3660: 1A - Pax Update](#) DONE

Improved passenger update functionality for 1A to ensure accurate and seamless modification of passenger details.

- [R2X23M-3650: AI- Retrieval of Upsell Offers for AI via OfferPriceRQ Indicator](#) DONE

Enabled retrieval of upsell offers in AI flow using the OfferPriceRQ indicator, allowing the system to fetch and present relevant upgrade options during pricing.

Improvements to existing features

- [↑ R2X23M-3622: Merge "Type" and "Shared From" columns into single "Ownership" column](#)
[in Subscriptions List](#) DONE

- Simplified the Subscriptions List UI by combining “Type” and “Shared From” into a single “Ownership” column, improving clarity and usability.
