Summary

This release focuses on improvements to Agency Signup and Management workflows, along with key bug fixes. It enhances the agency invitation and registration process, resolves admin-side issues, and improves overall system stability for a smoother onboarding experience.

New Feature

- 📌 [R2X23M-3577: Agency Signup via Invitation Email \(Agency Onboarding Flow\)](#) DONE

The Agency Signup via Invitation Email feature enables admins to invite sub-agencies through email, allowing them to register via a secure link and submit required details. The request goes through an approval workflow, and once approved, the sub-agency is activated. This streamlines onboarding, reduces manual effort, and ensures consistent data management.

Customer Support fixes

- 🔖 [R2X23M-3934: Amadeus 21.3 - POS is going as "IN" in OfferPrice request](#) DONE

- [R2X23M-3925: Report-PlatformAdmin-Platform Admin Report giving different value for same period at different time](#) DONE
